

Low Cutting Force 90° Milling Cutter with Double-sided 6-Edge Inserts

MFWN Mini

NEW

Excellent Performance and Durability in a Smaller, Economical Size

6 Usable Cutting Edges Lowers Machining Costs
(Depth of cut ~ 5mm)

Additional Fine Pitch, Small Diameter Toolholders Available

Inherits MFWN Series' Unique Design Technology with Fracture-Resistant Inserts and Low Cutting Forces

Cutter: ϕ 50 to ϕ 125End Mill: ϕ 25 - ϕ 80

Low Cutting Force 90° Milling Cutter with Double-sided 6-Edge Inserts

MFWN Mini

Introducing Economical Small Diameter MFWN Series Milling Cutters
Additional Fine Pitch, Small Diameter Toolholders Available

1

MFWN Mini Uses Cost-Efficient 6-Edge Inserts

6-Edge, Double-Sided Insert

Smaller insert design technology maintains original MFWN cutting performance
Can be used up to 5mm D.O.C.

Smaller Insert Size

MFWN Mini
05 Size

NEW

D.O.C. ~ 5mm

MFWN
08 Size

D.O.C. ~ 8mm

Increased Versatility

Large small-diameter lineup

High-efficiency machining
with fine pitch styles

1 ~ 3 additional flutes

Expanded lineup of
smaller diameters

Face Mill ϕ 50
End Mill ϕ 25 - ϕ 40

NEW

1 Low Cutting Force and High Chattering-Resistance

Steep rake angle minimizes cutting forces

Dynamic slant design reduces initial impact when entering the workpiece

A.R. Max +11°

Dynamic slant design

Cutting force comparison (Internal evaluation)

Cutting conditions : $V_c = 150$ m/min, $f_z = 0.15$ mm/t, $a_p \times a_e = 1.5 \times 35$ mm, Dry
Cutting Dia. $\phi 63$ Workpiece : SCM 440

2 Superior Fracture Resistance with Thick Edge Design

Stable Clamping Strength with Unique Insert Face Design

Cutting Edge Thickness: 5.2mm
(3.1mm at the thinnest point)

Optimized seating surface

3 Neutral Inserts for Various Uses

Symmetrical side and bottom cutting edges provide a wide range of machining applications

Bottom Edge

Side Edge

Can be used for plunging applications

Left-handed Toolholders are also Available (Custom Order)

Fracture resistance comparison (Internal evaluation)

Cutting conditions : $V_c = 120$ m/min, $a_p \times a_e = 1.5 \times 30$ mm, Dry
Cutting dia. $\phi 63$ Workpiece : Mold Steel 37 ~ 43 HRC

Three insert chipbreakers and four grades available

Low Cutting Force **SM**

General Use **GM**

Tough Edge **GH**

Applicable Chipbreaker Range

Steel, Cast Iron, Stainless Steel and Heat-Resistant Alloy for Machining

MEGACOAT NANO **PR1510 / PR1525 / PR1535**

For hardened materials (60 HRC or less)

MEGACOAT HARD **PR015S** (GH only)

Recommended Cutting Conditions Table ★1st recommendation ☆2nd recommendation

The number in bold font is recommended starting conditions. Adjust the cutting speed and the feed rate within the above conditions according to the actual machining situation.

Machining with coolant is recommended for Ni-base heat resistant alloy and titanium alloy

When using GH chipbreaker in fine pitch cutters, recommended feed is fz ≤ 0.2 (mm/t).

GH chipbreaker is not recommended for extra fine pitch cutters.

PR015S

Long tool life and stable machining for hardened materials

Excellent performance with improved thermal properties and MEGACOAT HARD

NEW

1 Improvement of Thermal Properties to Reduce Sudden Defects and Boundary Damage in Insert

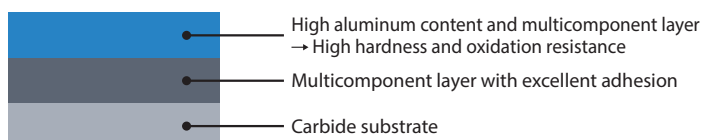

Improved thermal conductivity by optimum distribution of WC coarse grains (Compared to the previous model)

Resists heat concentration at the cutting edge to promote stable machining

2 Improved wear resistance with MEGACOAT HARD coating

MEGACOAT HARD : High hardness and high heat-resistant PVD layer

Coating Properties (Internal evaluation)

Excellent wear resistance with high-hardness and resists boundary damage with improved thermal properties

Maximum number of revolutions

Set the number of revolutions per minute within the recommended cutting speed specified by the workpiece on page 3.

Do not use the end mill or cutter at the maximum revolution or higher since the centrifugal force may cause chips and parts to scatter even under no load.

Caution with Max. Revolution

Set the number of revolutions per minute within the recommended cutting speed specified by the workpiece on page 3.
Do not use the end mill or cutter at the maximum revolution or higher since the centrifugal force may cause chips and parts to scatter even under no load.

● : Standard Stock

Vertical Milling (Plunging)

Available for Vertical Milling (Plunging)

Cutting Dia.	Maximum width of cut (ae)
All Description	5 mm

Ramping and helical milling are not recommended due to interference between workpiece and flank face

Applicable Chipbreaker by Cutter Type

Cutter type	Chipbreaker		
	GM	SM	GH
Cross Pitch	○	○	○
Extra Cross Pitch	○	○	△ (fz = 0.2mm/t or less is recommended)

How to mount inserts

1. Completely eliminate chips and dust from the insert mounting side
2. Coat anti-seize compound thinly on portion of taper and thread of clamp screw prior to installation.
After mounting a clamp screw on the top edge of wrench, tighten the screw while keeping the insert pushed against the shim seat surface and holder surface (Fig.1)
3. Tighten the wrench in while holding parallel to the clamp screw.
Recommended tightening torque ··· 1.2 N/m
4. After tightening, check that there is no gap between the contact surface of the insert and the surface of the shim, or between the side surface of insert and the holder surface. If there is a gap, remount the insert using the directions above.

90° Cutter 1st Recommendation

Cost-effective Solution with Greater Edge Strength

Low Cutting Force 90° Milling Cutter

MFWN

Economical Double-sided, 6-Edge Inserts with Excellent Fracture Resistance

D.O.C. $a_p \approx 5\text{mm}$

MFWN Mini

MFWN Mini is a great cost-effective solution with excellent versatility

D.O.C. $a_p \approx 8\text{mm}$

MFWN

Large D.O.C.
Excellent fracture resistance

End Mill 1st recommendation

Chatter-Resistant Precision Machining

High-performance End Mill

MEV

New Generation of High Performance,
Economical, Multi-functional Milling Cutters

Newly developed vertical triangle inserts with 3 cutting edges

High Performance - Low cutting forces and Higher Rigidity for Excellent Chatter Resistance

Economical - Longer Insert and Holder Tool Life

Multi-functional - Can be Used in Shouldering, Slotting, and Ramping Applications
